

GREENING COMMITMENT

The purpose of Greening Alabaré is to oversee the review, clarification and strengthening of sustainable practices within Alabaré's community, homes, and services.

We will:

- Identify ongoing issues surrounding sustainability and introduce new methods or procedures to have greener homes, services, and offices, such as encouraging lift shares, EV use, cycle to work schemes etc.
- Work with more community, council or national groups in events and projects surrounding sustainability.
- Reduce cost and waste where possible, use more sustainable products in our homes, services, and offices, work towards sustainable energy in each of our owned properties, and actively seek leased properties with 'green' energy provision, work with external partners to manage third party carbon emissions and off set carbon emissions with the aim of being Carbon Neutral by 2050.
- Establish Greening as an integral part of the Alabaré ethos and ensure all members of the Alabaré community are educated and aware of the Greening procedure and can contribute to its growth where possible.
- To adhere to and take responsibility for Environmental Policy No.19: Affects all homes, services, departments and shops.
